Trustee's Report

The Trustee presents its report together with the financial statements of NAB Covered Bond Trust (the Trust) for the year ended 30 September 2020 and the auditor's report thereon.

The financial statements are prepared by National Australia Bank Limited (Trust Manager) as required by the Establishment Deed dated 10 November 2011 between Perpetual Corporate Trust Limited (Trustee of the NAB Covered Bond Trust and Covered Bond Guarantor) and National Australia Bank Limited (Issuer, Seller, Servicer and Trust Manager).

The auditors of the Trust, Ernst & Young, who have been appointed by the Trustee in accordance with clause 31 of the Trust agreement have conducted an audit of the financial statements.

A review of the operations of the Trust and the results of those operations for the financial year ended 30 September 2020 is contained within the Trust Manager's Report.

Based on the Trustee's ongoing programme of monitoring and the Trustee's review of the financial statements, the Trustee believes that:

(ii) the Financial Report has been conducted in accordance with the Establishment Deed dated 10 November 2011 and the Management Agreement dated 11 November 2011; and (iii) the Financial Report has been prepared and contains all relevant and required disclosures in accordance with the aforementioned Establishment Deed and Management Agreement.

The Trustee is not aware of any material matter or significant change in the state of affairs of the Trust occurring up to the date of this report that requires disclosure in the financial statements and the notes thereto that has not already been disclosed.

Signed on behalf of Perpetual Corporate Trust Limited as Trustee of NAB Covered Bond Trust:

Juan Gilarte

Nethan Cele

Trust Manager's Report

The Trust Manager presents its report on the financial statements of the NAB Covered Bond Trust (the Trust) for the year ended 30 September 2020.

Trust Information

The Trustee of the Trust is Perpetual Corporate Trust Limited, which has been the Trustee since commencement date, 15 November 2011.

The Trust was established on 10 November 2011 under the NAB Covered Bond Trust Establishment Deed dated 10 November 2011 between National Australia Bank Limited (Trust Manager) and Perpetual Corporate Trust Limited (Trustee).

Principal activities

The principal activities of the Trust are the acquisition, management and sale of mortgage receivables. These mortgage receivables support a guarantee provided by the Trust to the Trustee associated with the issue of covered bonds by National Australia Bank Limited (NAB).

Review of results of operations

Net gain of the Trust after distributions for the period ended 30 September 2020 amounted to \$11.9 million (2019 : \$824.2 million).

Covered Bonds have been issued by NAB in the following series during the year:

Series 35 - GBP 1,000,000,000 Covered Bonds @ SONIA + 0.50% floating rate due on 4 February 2025

Trust distributions

The Trust has recognised distributions of residual income of \$588.5 million for the year ended 30 September 2020 (2019: \$518.8 million). The distribution payable as at 30 September 2020 was \$221.2 million (2019: \$75.5 million).

State of affairs

There have been no significant changes in the state of affairs of the Trust during the year ended 30 September 2020. The COVID-19 outbreak was declared a global pandemic by the World Health Organisation in March 2020. The impact of COVID-19 has been assessed by the Trust and overall has had minimal impact on the operations of the Trust during the financial year.

Significant events after the reporting date

Since 30 September 2020 and as at the date of this report, the trust has undertaken transactions in the ordinary course of business. The most significant of these transactions include:

- Reduction in the Demand Note of \$550 million on 28 October 2020
- Increase in the Demand Note of AUD \$1.88 billion on 16 November 2020
 Reduction in the Demand Note of \$650 million on 26 November 2020

There has been no other matter or circumstance that has arisen since the end of the financial year that, in the opinion of the Trust Manager, has significantly affected, or may significantly affect, the Trust's operations in future financial years.

Likely developments and expected results

The Trust is expected to continue its operations in accordance with the purposes outlined in the Establishment Deed.

Environmental regulation

The operations of the Trust are not subject to any particular or significant environmental regulation under a law of the Commonwealth or of a State or Territory. There have been no known significant breaches of any other environmental requirements applicable to the Trust.

Indemnification

During or since the end of the year, the Trust has not provided any indemnification of any person who is or has been an officer of the Trustee or the Trust Manager or auditors of the Trust.

Insurance

No insurance premiums have been paid during, or since the end of the year for a person who is or has been an officer of the Trustee or the Trust Manager or auditors of the Trust.

Rounding

Pursuant to Australian Securities and Investments Commission (ASIC) Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191, the Trust has rounded off amounts in this report and the accompanying financial report to the nearest thousand dollars, except where indicated.

14 December 2020

Signed for and on behalf of National Australia Bank Limited as Trust Manager of NAB Covered Bond Trust:

du

Michael Johnson, Head of Group Funding, NAB

Lachlan Rose, Head of Treasury Governance Business Management, NAB

14 December 2020

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 SEPTEMBER 2020

1 Corporate information

NAB Covered Bond Trust (the Trust) was established on 10 November 2011 under the NAB Covered Bond Trust Establishment Deed dated 10 November 2011 between National Australia Bank Limited (NAB, Issuer, Seller, Servicer and Trust Manager) and Perpetual Corporate Trust Limited (Trustee of the NAB Covered Bond Trust and Covered Bond Guarantor).

The Trust is a for-profit entity and a description of the Trust operations and principal activities is included in the Trust Manager's Report on page 5.

The financial statements of NAB Covered Bond Trust for the year ended 30 September 2020 were authorised for issue by the Trust Manager on 14 December 2020.

2 Summary of significant accounting policies

(a) Basis of preparation

This General Purpose Financial Report has been prepared in accordance with the requirements of the Establishment Deed and accounting standards and interpretations issued by Australian Accounting Standards Board (AASB).

The financial report has been prepared under the historical cost convention, as modified by the application of fair value measurements required or allowed by relevant accounting standards.

The statement of financial position is presented on a liquidity basis. Assets and liabilities are presented in decreasing order of liquidity and are not distinguished between current and non-current.

The financial statements are presented in Australian Dollars and all values are rounded to the nearest thousand except where otherwise indicated.

(b) Statement of Compliance

. The financial report of the Trust complies with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

(c) New accounting standards issued but not yet effective

(i) Changes in accounting policy and disclosure

The Trust adopted the following new accounting standards and interpretations effective from 1 October 2019: • AASB 2019-3 Amendments to Australian Accounting Standards - Interest Rate Benchmark Reform

Interest Rate Benchmark Reform

The Trust has early adopted AASB 2019-3 Amendments to Australian Accounting Standards – Interest Rate Benchmark Reform released by the AASB in October 2019. AASB 2019-3 amends AASB 7 Financial Instruments: Disclosures and AASB 9 Financial Instruments, modifying some specific hedge accounting requirements to provide relief from the potential effects of the uncertainty caused by interest rate benchmark reform (IBOR reform).

In accordance with the transitional provisions, the amendments have been applied retrospectively to hedging relationships that existed at the start of the reporting period and that were designated thereafter. The standard did not have a significant impact on the Trust as it does not apply hedge accounting.

There were no other substantial amendments to accounting standards or interpretations adopted during the period that have a material impact on the Trust.

(ii) Early adoptions

The Trust has not elected to early adopt any new or amended accounting standards in the current year.

(iii) New and amended accounting standards not yet effective

The following issued, but not yet effective, new Australia Accounting Standards have not been applied in preparing this financial report:

AASB 2020-8 Amendments to Australian Accounting Standards - Interest Rate Benchmark Reform - Phase 2

In September 2020, the AASB issued AASB 2020-8 Amendments to Australian Accounting Standards - Interest Rate Benchmark Reform - Phase 2 to address the Financial reporting impacts related to market-wide benchmark interest rate reform. The amendments include a practical expedient for modifications of financial assets and financial liabilities, relief from discontinuing hedge accounting, and allow alternative benchmark rates to be deemed to be separately identifiable risk components for hedge accounting purposes. There are also additional disclosure requirements. The amendments apply to annual periods beginning on or after 1 January 2021. The Trust Manager is assessing the impact of these amendments.

Other amendments to existing standards that are not yet effective are not expected to result in significant impact to the Trust's financial reporting.

(d) Foreign currency translation

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are normally recognised in the statement of comprehensive income. Non-monetary items are translated using the exchange rate at the date of the initial recognition of the asset or liability.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 SEPTEMBER 2020

2 Summary of significant accounting policies (continued)

(e) Significant accounting judgements and estimates

The preparation of the Trust's financial statements requires the Trust Manager and Trustee to make use of certain critical accounting estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and the disclosed amount of contingent liabilities. However, uncertainty about these estimates and assumptions could result in outcomes that would require a material adjustment to the carrying amount of the asset or liability in future.

Fair Value measurement

Where no active market exists for a particular asset or liability, the Trustee uses a valuation technique to arrive at the fair value, including the use of transaction prices obtained in recent arm's length transactions, discounted cash flow analysis, option pricing models and other valuation techniques, based on market conditions and risks existing at reporting date. In doing so, fair value is estimated using a valuation technique that makes maximum use of observable market inputs and places minimal reliance upon entity-specific inputs.

The judgements include considerations of liquidity and model inputs such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. The models are calibrated regularly and tested for validity using prices from observable current market transactions in the same instruments (without modification or repackaging) or based on any observable market data. Valuation techniques will be used where conditions are unobservable.

Functional currency

Items included in the financial statement are measured using the currency of the primary economic environment in which the Trust operates (functional currency). The financial report is presented in Australian dollars, which is the Trust's functional and presentation currency.

Impairment of assets

Judgement is required by management in the estimation of the amount and timing of future cash flows when determining an impairment loss for loans and advances. In outgenerits required by management in the estimation of the amount and miner and available tash nows when determining an impairment loss for loans and advances. In estimating these cash flows, the Trust makes judgements about the borrower's financial situation and the net realisable value of collateral. These estimates are based on assumptions about a number of factors and actual results may differ, resulting in future changes to the impairment allowance.

Coronavirus (COVID 19)

Coronavirus (COVID 19), which is a respiratory illness caused by a new virus, was declared a worldwide pandemic by the World Health Organisation in March 2020. Measures to slow the spread of the virus have since had a significant impact on the domestic and global economy and equity, debt and commodity markets.

In preparing these financial statements the Trust has considered the impact of COVID 19 in its judgments or estimation uncertainty, its assessment of the fair value of the Trust's assets and liabilities and in determination of the completeness and appropriateness of financial statement disclosures

(f) Cash and cash equivalents

Cesh and cash equivalents in the statement of financial position comprise cash on hand, demand deposits, short term deposits in banks with original maturities of three months or less and short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in

Short term investments which are not held for the purpose of meeting short-term cash commitments as well as restricted margin accounts are not considered as cash and cash equivalents

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and cash equivalents as defined above, net of outstanding bank overdrafts.

(g) Financial Instruments

(i) Classification of financial instruments

The Trust classified its financial assets into the following measurement categories: -- those to be measured at fair value (either through other comprehensive income, or through profit or loss); and

- those to be measured at amortised cost

The classification depends on the Trust's business model for managing financial assets and the contractual terms of the financial assets cash flows. The Trust classifies its financial liabilities as liabilities at amortised cost or derivative liabilities.

(ii) Recognition and derecognition of financial instruments

A financial asset or financial liability is recognised in the statement of financial position when the Trust becomes a party to the contractual provisions of the instrument, which is generally on trade date. Loans and receivables are recognised when cash is advanced (or settled) to the borrowers.

Financial assets at fair value through profit or loss are recognised initially at fair value. All other financial assets are recognised initially at fair value plus directly attributable transaction costs. The Trust derecognises a financial asset when the contractual cash flows from the asset expire or it transfers its rights to rece contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of ownership are transferred. Any interest in transferred financial assets that is created or retained by the Trust is recognised as a separate asset or liability.

A financial liability is derecognised from the statement of financial position when the Trust has discharged its obligation or the contract is cancelled or expires.

(iii) Offsetting Financial assets and liabilities are offset and the net amount is presented in the statement of financial position when the Trust has a legal right to offset the amounts and intends to settle on a net basis or to realise the asset and settle the liability simultaneously.

(iv) Items at amortised cost

Loans and receivables are financial assets for which the contractual cash flows are solely repayments of principal and interest and that are held in a business model with the objective of collecting contractual cash flows. Subsequently, loans and receivables are measured at amortised cost using the effective interest rate method, net of any provision for credit impairment.

(v) Items at fair value through profit or loss

Items at fair value through profit or loss comprise:

items held for trading;

· items specifically designated as fair value through profit or loss on initial recognition;

· debt instruments with contractual terms that do not represent solely payments of principal and interest are measured at fair value through profit and loss.

Financial instruments held at fair value through profit or loss are initially recognised at fair value, with transaction costs recognised in the income statement as incurred. Subsequently, they are measured at fair value and any gains and losses are recognised in the income statement as they arise.

Held for trading

A financial instrument is classified as held for trading, if it is acquired or incurred principally for the purpose of selling or repurchasing in the near term, or forms part of a portfolio of financial instruments that are managed together and for which there is evidence of short-term profit taking, or it is a derivative not in a qualifying hedge relationship. Trading derivatives and trading securities are classified as held for trading and recognised at fair value.

instruments designated as measured at fair value through profit or los

Upon initial recognition, financial instruments may be designated as fair value through profit or loss. A financial asset may only be designated at fair value through profit or loss if doing so eliminates or significantly reduces measurement or recognition (i.e. eliminates an accounting mismatch) that would otherwise arise inconsistencies from measuring financial assets or liabilities on a different basis.

A financial liability may be designated at fair value through profit or loss due to an 'accounting mismatch' or

. In respect of an entire contract if a host contract contains one or more embedded derivatives

• If financial assets and liabilities are both managed and their performance evaluated on a fair value basis in accordance with a documented risk management or investment strategy.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 SEPTEMBER 2020

2 Summary of significant accounting policies (continued)

(h) Mortgage pool receivable

The Trust has purchased the rights, title and interests in a pool of residential real estate mortgages from NAB. Simultaneously, the Trust has entered into interest rate and basis swaps with NAB to economically hedge the interest rate risk arising due to the mortgage raceivables at mortgage rates and its interest bearing liabilities at BBSW rates. NAB does not separately recognise the interest rate and basis swaps as it would result in duplicating the recognition of the underlying mortgage receivables. Consequently, NAB recognises the obligation to pay cash flows associated with the pool of residential mortgages sold to the Trust together with the cash flows under the interest rate and basis swaps as an imputed floating rate loan. The terms of the interest rate and basis swaps result in NAB retaining substantially all of the risks and rewards associated with the mortgage loans, and as such, NAB is unable to derecognise those loans.

The Trust adopts a consistent accounting treatment, recognising the cash flows associated with the mortgage receivables together with the cash flows under the interest rate and basis swaps as an imputed floating rate loan. Payments under the swap contracts paid to or received from NAB are recorded in the statement of comprehensive income as interest income received on the mortgage pool receivable.

(i) Impairment of financial assets carried at amortised cost

The Trust applies a three-stage approach to measuring expected credit losses (ECL) on debt instruments accounted for at amortised cost. Assets migrate through the following three stages based on the change in credit quality since initial recognition:

i) Stage 1: 12-months ECL

For exposures where there has not been a significant increase in credit risk since initial recognition and that are not credit impaired upon origination, the portion of the lifetime ECL associated with the probability of default events occurring within the next 12 months is recognised.

ii) Stage 2: Lifetime ECL - not credit impaired

For credit exposures where there has been a significant increase in credit risk since initial recognition but that are not credit impaired, a lifetime ECL is recognised.

Financial assets are assessed as credit impaired when one or more events that have a detrimental impact on the estimated future cash flows of that asset have occurred. For financial assets that have become credit impaired, a lifetime ECL is recognised and interest revenue is calculated by applying the effective interest rate to the amortised cost (net of provision) rather than the gross carrying amount.

At each reporting date, the Trust assesses whether there has been a significant increase in credit risk for financial assets since initial recognition by comparing the risk of default occurring over the expected life between the reporting date and the date of initial recognition.

In determining whether credit risk has increased significantly since initial recognition, the Trust uses its internal credit risk grading system, external risk ratings and forecast information to assess deterioration in credit quality of a financial asset.

The Trust assesses whether the credit risk on a financial asset has increased significantly on an individual or collective basis. For the purposes of a collective evaluation of impairment, financial assets are assessed on the basis of shared credit risk characteristics, taking into account instrument type, credit risk ratings, date of initial, recognition, remaining term to maturity, geographical location of the borrower and other relevant factors.

The amount of ECL is measured as the probability-weighted present value of all cash shortfalls over the expected life of the financial asset discounted at its original effective interest rate. The cash shortfall is the difference between all contractual cash flows that are due to the Trust and all the cash flows that the Trust expects to receive. The amount of the loss is recognised using a provision for doubtful debts account.

The Trust considers its historical loss experience and adjusts this for current observable data. In addition, the Trust uses reasonable and supportable forecasts of future economic conditions including experienced judgement to estimate the amount of an expected impairment loss. Macroeconomic factors which include, but is not limited to, unemployment, interest rates, gross domestic product, inflation and commercial property-prices, and requires an evaluation of both the current and forecast direction of the economic cycle. Incorporating forward looking information increases the level of judgement as to how changes in these macroeconomic factors will affect ECL. The methodology and assumptions including any forecasts of future economic conditions are reviewed regularly.

If, in a subsequent period, credit quality improves and reverses any previously assessed significant increase in credit risk since origination, then the provision for doubtful debts reverts from lifetime ECL to 12-months ECL.

The Trust Manager performs an assessment of the debt instruments at amortised cost at each reporting date, and has determined that due to the quality of the underlying assets, no ECL has been recognised in the Trust.

(j) Goods and services tax

Revenue, expenses and assets are recognised net of the amount of goods and services tax (GST) except:

• when the GST incurred on a purchase of goods and services is not recoverable from the taxation authority, in which case the GST is recognised as part of the cost of acquisition of the asset or as part of the expense item applicable; and

· receivables and payables are stated with the amount of GST included.

Trustee's fees and other relevant expenses are recognised in the statement of comprehensive income net of the amount of GST recoverable from the Australian Taxation Office. Input tax credits recoverable by the Trust from the Australian Taxation Office are recognised as a receivable in the statement of financial position.

Cash flows are included in the statement of cash flows on a gross basis and the GST component of cash flows arising from investing and financing activities, which is recoverable from, or payable to the taxation authority is classified as part of operating cash flows.

The Trust is part of the NAB Consolidated Group for the purposes of GST, hence transactions between NAB and the Trust are not subject to GST.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 SEPTEMBER 2020

2 Summary of significant accounting policies (continued)

(k) Trust units

Residual Capital Units

Each unit issued confers upon the unitholder an equal interest in the Trust, and is of equal value. A unit does not confer any interest in any particular asset or investment of the Trust. The interest of Residual Capital Unitholders comprises an interest in its proportion of any assets of the Trust remaining after payment of any amount due to the Residual Income Unitholder.

Residual Income Linits

Each unit issued confers upon the unitholder an equal interest in the Trust and is of equal value. A unit does not cover any interest in any particular asset or investment of the Trust. The interest of Residual Income Unitholders comprises the Net Trust Income of the Trust for each Fiscal Period.

(i) Revenue recognition

Revenue is recognised and measured at the fair value of the consideration received or receivable, to the extent it is probable that the economic benefits will flow to the Trust and the revenue can be reliably measured.

(m) Interest Revenue and Expense

Interest revenue and expense are recognised in the Statement of comprehensive income for all financial instruments not at fair value through profit or loss using the effective interest method. Interest earned on financial assets classified as at fair value through the profit or loss is recorded in 'Interest revenue' according to the terms of the contract

(n) Fees and commissions

Unless included in the effective interest calculation, fees and commissions are recognised on an accruals basis when the service has been provided or on completion of the underlying transaction. Management fees are recognised over the period the service is provided.

(o) Net gains or losses on financial instruments at fair value

Net gains or losses on financial instruments at fair value comprise fair value gains and losses from:

- trading derivatives: and
- other financial assets and liabilities at fair value through profit or loss.

Realised Interest income or expense attributable to trading derivatives is recognised within net interest income and not part of the fair value movement of the trading derivative.

(p) Distributions

In accordance with the Trust Deed, the Trust distributes all its Residual Income to the Residual Income Unitholders. Residual Income includes all items that would be included or deducted for the purpose of calculating the Net Taxable Income of the Trust.

Distributions are paid regularly during the year. Such distributions are determined by reference to the Net Taxable Income of the Trust.

Distributable income includes capital gains arising from the disposal of investments. Unrealised gains and losses are transferred to Trust capital and are not assessable or distributable until realised. Capital losses are not distributed to unit holders but are retained to be offset against any future realised capital gains. Distributions to Residual Income Unitholders are recognised in the Statement of comprehensive income.

(q) income tax

Under current Australian legislation, the Trust is not subject to income tax provided the unit holders are presently entitled to the income of the Trust and the Trust fully distributes its net taxable income. Any subsequent period adjustments to deferred tax assets arising from unused tax losses as a result of revised assessments of the probability of recoverability is recognised by the Residual Income Unitholder (NAB) only.

	Montgage collections receivable	61,503	61,971
	Total loans and receivables	29,208,954	26,181,956

Mortgage pool receivables relate to equitable interests in mortgages over residential real estate securing loans that have been sold to the Trust. As at 30 September 2020, the mortgage pool receivable comprised of cash flows from 97,850 (2019: 85,954) mortgage loans granted to prime Australian borrowers, secured over Australian residential properties with a weighted average current loan to value ratio of 56.62% (2019: 56.54%).

Mortgage collections receivable represents payments from mortgages that have been received by NAB but not yet paid to the Trust.

Intercompany notes

Intercompany notes are issued by the Trust to NAB to mirror the Covered Bonds issued by NAB on market. Under the NAB covered bond program the aggregate issue amount must not exceed US\$30,000 million.

Demand note

The Trust borrows funds from NAB under the Demand Note in order to acquire mortgage pool receivables. Borrowing under the Demand Note is denominated in Australian dollars and is subject to floating interest rates. The maturity of the Demand Note is linked to the maturity of the Intercompany Note issued by the Trust with the longest tenor.

13 Derivative assets and liabilities measured at fair value through profit or loss

The operations of the Trust are subject to the risk of interest rate fluctuations to the extent of the repricing profile of the Trust's statement of financial position. Derivative financial instruments are held for the purpose of managing the foreign exchange and interest rate risk between its mortgage pool receivable assets and its borrowings. These derivatives are classified as held for trading and are measured at fair value through profit or loss. Specifically, the Trust uses cross currency and interest rate swaps as economic hedges of foreign currency and interest rate risk arising on floating rate foreign currency borrowings.

The tables below set out the fair value of trading derivatives including notional values:

Derivative financial instruments					
	2020		2019		
	Notional	Fair value	Notional	Fair value	
	\$'000	\$'000	\$'000	\$'000

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 SEPTEMBER 2020

14 Covered Bonds Guarantee

As at 30 September 2020, NAB has issued \$22,558 million (2019: \$20,631 million) of Covered Bonds. The Trustee, as Covered Bond Guarantor, has guaranteed payments of interest and principal of Covered Bonds issued by NAB, with the sole source of payments by the Covered Bond Guarantor being the assets of the Trust. The Covered Bond Guarantor's obligations under the Covered Bond Guarantee are secured by the assets of the Trust and recourse against the Covered Bond Guarantor is limited to the Trust assets.

The value of the NAB issued Covered Bonds noted above is the AUD equivalent of the face value of the bonds issued by NAB, at the exchange rates at which they were swapped into AUD. This differs from the values on the statement of financial position which is the AUD equivalent of the face value of the bonds converted at year-end spot rates

The Covered Bond Guarantor will have no obligation to make payments under the Covered Bond Guarantee until the occurrence and continuation of an Issuer Event of Default. Issuer Events of Default include:

· failure by the Issuer to make payments of principal or interest on the Covered Bonds when due;

insolvency of the Issuer or the appointment of a receiver or administrator over the Issuer's assets;

A later by the Issuer to perform or before the solution of the Covered Bonds; or
 Issuer to see the Asset Coverage Test (ACT), or in the case of Hard Bullet Covered Bonds only, breach of the Pre-Maturity Test (PMT) and a failure, in each case, to take

the required mitigating action

The ACT is designed to protect Covered Bondholders by ensuring that the assets of the Trust are sufficient for the Covered Bond Guarantor to meet its obligations under the Covered Bond Guarantee. The PMT is intended to ensure that the Covered Bond Guarantor has sufficient liquidity within a 12 month period prior to the maturity of Hard Bullet Covered Bonds to ensure that payments of principal and interest can be made on maturity of such Covered Bonds.

The fair value of the Covered Bond Guarantee is negligible as the liability to the Covered Bondholders on the occurrence of an Issuer Event of Default is already recognised by the Trust through the Intercompany Notes issued by the Trust to NAB.

As at 30 September 2020, Covered Bonds issued by NAB have been assigned AAA rating by Fitch Australia Pty Ltd and Aaa credit rating by Moody's Investor Services Pty Ltd

15 Financial risk management disclosures

The key financial risks faced by the Trust are:

market risk including interest rate risk and currency risk; and

liquidity risk.

credit risk:

Further details regarding the nature and extent of each key financial risk faced by the Trust, and how these are risks are managed, are outlined as part of this note.

Governance and oversight

The financial risks to which the Trust is exposed are managed and overseen as contemplated and sanctioned in the Trust Establishment Deed and other associated transaction documentation.

As Trust Manager, NAB applies the risk management governance and frameworks applicable to NAB, its subsidiaries and structured entities. Risk is identified and managed as part of an enterprise Group-wide risk management framework that starts with the Board approved Strategy, Risk Appetite, Capital, Funding and Operational Plans. Risk Appetite is translated and cascaded to the businesses qualitatively (through the Group's risk postures, policies, standards and operating procedures) and quantitatively (through the Group's risk limits, settings and decision making authorities).

In addition to the above, the financial risks to which the Trust is exposed arise as a result of transactions undertaken by the Trust. These transactions are undertaken for purposes relating only to the Covered Bonds. As such, much of the required management and mitigation of risks arising on such transactions is defined within the associated transaction documentation. The impact of provisions of transaction documentation on financial risks is discussed below, in relation to each financial risk.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 SEPTEMBER 2020

15 Financial risk management disclosures (continued)

Credit risk

The Trust is a special purpose entity which has been established to acquire NAB mortgage loans and the related securities and to provide a guarantee over Covered Bonds issued by NAB.

Credit risk is the potential that a counterparty will fail to meet its obligations to the Trust in accordance with agreed terms. The Trust's credit exposures are concentrated primarily to one counterparty, NAB. The transaction documents contain a number of provisions that mitigate the effect of the credit exposure to NAB. Some of these are detailed in the sections below.

Maximum exposure to credit risk

The Trust's maximum exposure to credit risk without taking account of collateral or other credit enhancements is the carrying value of cash and cash equivalents, interest receivable, derivative assets and mortgage pool receivables. Credit risk arising from derivative financial instruments is, at any time, limited to those with positive fair values as recorded in the statement of financial position.

For financial assets recognised on the statement of financial position, the gross exposure to credit risk equals their carrying amount.

The Trust manages credit risk arising on individual types of transactions in specific ways.

(a) Derivatives

At any one time, the maximum exposure to credit risk is limited to the current fair value of instruments that are favourable to the Trust less collateral obtained.

The Trust uses documentation including International Swaps and Derivatives Association (ISDA) Master Agreements to document derivative activities. Under the ISDA Master Agreements, if a default of a counterparty occurs, all contracts with the counterparty are terminated. They are then settled on a net basis at market levels current at the time of default. The Trust also executes Credit Support Annexes (CSA) in conjunction with ISDA Master Agreements.

In order to meet rating agencies' requirements the CSA's provide, where relevant, that in the event of adverse ratings action, NAB must post collateral to support the value of the derivatives favourable to the Trust, and in the event of continuing adverse ratings action make efforts to transfer its obligations under the derivative contracts to an alternative party of appropriate credit standing.

Collateral held by the Trust in support of derivative assets as at 30 September 2020 was nil (2019: nil).

Offsetting of financial assets and liabilities

The table below illustrates the amounts of financial instruments that have been offset on the statement of financial position and also those amounts that are subject to enforceable master netting arrangements or similar agreements (i.e. offsetting agreements and any related financial collateral). The table excludes financial instruments not subject to offset and that are only subject to collateral arrangements.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 SEPTEMBER 2020

15 Financial risk management disclosures (continued)

(b) Mortgage pool receivable

Under the transaction documents, the Trust is entitled to cashflows associated with mortgages in the mortgage pool.

The mortgage pool receivables relate to the housing loans issued by NAB that are secured against Australian residential property as collateral, and where applicable, Lenders Mortgage Insurance (LMI). Mortgage pool receivables are monitored regularly for indicators of impairment as outlined in Note (2) (i).

For the year ended 30 September 2020, there were no bad debts (2019: nil). As at that date, 300 loans representing less than 1% (\$118.9m) of the outstanding balance were in arrears i.e. greater than 30 days past due (2019: 407 loans representing less than 1% (\$145.2m) of the outstanding balance). Financial assets have not deteriorated significantly since origination if they are less than 30 days past due. Impaired assets are considered the loans that are contractually past due more than 90 days, including loans where the security is insufficient to cover principal and interest. No provision has been recognised by the Trust in relation to the mortgage loans in the cover pool as the Trust Manager has the discretion under clause 13 of the Mortgage Sale Agreement to sell the Trust's interests in non-performing mortgage loans to NAB as Seller.

Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market variables such as interest rates, foreign exchange rates and other prices. The Trust is exposed to interest rate risk and foreign currency risk as described below.

(I) Interest rate risk

Interest rate risk arises from the possibility that changes in interest rates will affect future cash flows or the fair value of financial instruments. The Trust uses cross currency swaps and interest rate and basis swaps to economically hedge the interest rate differential between mortgage pool receivable assets and interest bearing liabilities. To date, assets and liabilities have routinely been economically hedge to monthly benchmark floating interest rates, however the benchmark floating rate of another tenor may be used for effective interest rate risk management.

To the extent that the interest rate reset dates for the interest bearing liabilities provided by NAB (as economically hedged using cross currency interest rate swaps) and the mortgage pool receivable (as economically hedged to an imputed floating rate loan using interest rate and basis swaps) remain aligned, the future cash flows of the Trust are minimally affected by changes in interest rates. In addition, the sensitivity of profit or loss and net assets or liabilities attributable to unitholders to changes in interest rates is limited by the recognition of distributions to residual income unitholders which return the taxable income of the Trust to nil at each reporting date.

Residual interest rate risk arises primarily as a result of possible changes in the fair value of fixed future cash flows attributable to the margin above benchmark rates at which the intercompany notes were issued and swapped into Australian dollars using cross currency swaps. The following table shows the impact of a reasonably possible change in AUD interest rates as at 30 September assuming all other variables remain constant:

	Impact or	Impact on Profit		Impact on net assets/(liabilities) attributable to unitholders	
	2020	2019	2020	2019	
	\$'000	\$'000	\$'000	\$'000	
+25 basis points	9,977	8,123	9,977	8,123	
-25 basis points	(9,977)	(8,123)	(9,977)	(8,123)	

(ii) Foreign currency risk

Foreign currency risk arises from the possibility that changes in currency exchange rates will affect the future cash flows or the fair value of financial instruments.

Foreign currency risk in the Trust arises as a result of the Trust issuing intercompany notes to NAB in currencies other than Australian dollars. All non-Australian dollar cash flows arising on the intercompany notes with NAB are economically hedged by the Trust using cross currency swaps to swap the foreign currency cash flows for Australian dollar cash flows. As a result, any changes in foreign exchange rates will have minimal impact on the future cash flows of the Trust, on its profit or loss or on net assets or liabilities attributable to unitholders. Any foreign exchange gain or loss arising on the intercompany notes will be offset by an equal and opposite gain or loss or in the ddging cross currency swap.

(III) Liquidity risk

Liquidity risk is the risk that the Trust is unable to meet its financial obligations as they fall due. These obligations mostly include payment of interest and repayment of principal.

Key principles adopted in the Trust approach to managing liquidity risk include:

· continuously monitoring cash flows;

· maintaining adequate cash reserves;

economically hedging the maturity of loans with corresponding interest rate and basis swap maturities;

· managing the margin between interest receivable and interest payable.

Contractual maturity of assets and liabilities

The following tables show an analysis of contractual maturities at balance date of assets and liabilities.

	As at 30 September 2020			As at 30 September 2019		
	Less than 12 months \$'000	Greater than 12 months \$'000	Total \$'000	Less than 12 months \$'000	Greater than 12 months \$'000	Total \$'000

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 SEPTEMBER 2020

16 Fair value of financial assets and liabilities

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The estimated fair values are based on relevant information available as at the reporting date and involve judgement.

The table below shows a comparison of the carrying amount, as reported on the statement of financial position and fair value of those assets and liabilities, using a hierarchy that reflects the significance of inputs used in measuring the fair value. The level in the fair value hierarchy within which a fair value measurement is categorised is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. The fair value hierarchy is as follows:

 Level 1 fair value measurements - quoted prices (unadjusted) in active markets for identical financial assets or liabilities.
 Level 2 fair value measurements - inputs other than quoted prices within Level 1 that are observable for the financial asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3 fair value measurements - inputs for the financial asset or liability that are not based on observable market data (unobservable inputs).

The carrying value of cash and cash equivalents, trade and other receivables, trade and other payables and distributions payable approximate their fair value as they are short term in nature or are receivable on demand.

The fair value estimates are based on the following methodologies and assumptions:

 The fair value of trading and hedging derivative assets and liabilities, including interest rate swaps and cross currency swaps are obtained from discounted cash flow
models. During the year the valuation of derivatives was updated to continue to align with market pricing convention including the recognition of credit and funding valuation adjustments

• The fair value of mortgage pool receivables that reprice within six months of reporting date is assumed to equate to the carrying value. The fair value of other mortgage pool receivables are calculated using discounted cash flow models based on the maturity of the mortgage pool receivables. The discount rates applied are based on interest rates at reporting date for similar types of mortgage receivables.

.

. The fair value of interest bearing liabilities are calculated based on the discounted cash flow model using a yield curve appropriate to the remaining maturity of the instruments and appropriate credit spreads.

	As at 30 September 2020

There were no transfers into or out of Level 3 for the years ended 30 September 2020 and 2019.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 SEPTEMBER 2020

17 Related party transactions

National Australia Bank Limited ("NAB")

NAB is the counterparty to the Trust in relation to the Mortgage Pool Receivable, Intercompany Notes and the Demand Note. NAB is also the issuer, Seller, Servicer, Trust Manager, Account Bank, Swap Provider (Covered Bond Swaps, Interest Rate Swaps and Basis Swaps), Intercompany Note Provider and Demand Note Subscriber. Interest income received and interest expense received from and paid to NAB is disclosed on the face of the income statement and is also disclosed in Notes 3 and 4.

All fees are calculated at arm's length and on normal terms and conditions. The Trust Manager's fee is disclosed in Note 5.

Total balances with related entities outstanding at 30 September 2020 were:

	2020	2019
	\$'000	\$'000
Cash and cash equivalents	868,117	1,520,348

Distributions payable	221,227	75,472
Derivative liabilities	168,301	27
Interest bearing liabilities	32,093,958	30,147,076

The Trust is considered to be a special purpose entity consolidated into the NAB Group (NAB and its controlled entities) of which NAB is the parent entity. NAB services the mortgage pool receivable with a value of \$29,147 million (2019: \$26,119 million).

The loans and advances balance in the above table consists of mortgage pool receivables of \$29,147 million (2019: \$26,119 million) and mortgage collections receivables of \$61 million (2019: \$61 million).

The outstanding balances arose in the ordinary course of business.

Guarantees over Covered Bonds have been given and are detailed in Note 14. The following are the Covered Bond issues which the Trust has provided a guarantee over:

Demand note

The Trust borrows funds from NAB under the Demand Note Subscription Agreement in order to acquire mortgage pool receivables. Borrowing under the Demand Note is denominated in Australian dollars and is subject to floating interest rates. Amounts owed by the Covered Bond Guarantor under the Demand Note Subscription Agreement will be subordinated to amounts owed by the Covered Bond Guarantor under the Covered Bond Guarantee in accordance with the applicable priority of payments.

Intercompany notes

Fixed rate intercompany notes

Interest on fixed rate intercompany notes are payable in arrears according to their payment frequency.

The fixed rate intercompany notes are provided by NAB under the terms and conditions of the Intercompany Note Subscription Agreement. NAB will have recourse and claim only in respect of the assets of the Trust. Any advances owed by the Covered Bond Guarantor and Trustee will be made in accordance with the applicable priority of payments. The fixed rate intercompany notes are measured at amortised cost.

In consideration for the Covered Bond Guarantor agreeing to give the Covered Bond Guarantee, the Intercompany Loan provider has agreed to make advances to enable the Trust to acquire mortgage loans and other assets to support the Covered Bonds Guarantors obligations under the Covered Bond Guarantee. In accordance with the Intercompany Note Subscription Agreement, the amount and term of each fixed rate intercompany note equals the amount and term of the corresponding tranche of Covered Bonds issued by NAB.

Floating rate intercompany notes

The floating rate intercompany notes' interest rates reset on quarterly basis and are measured at amortised cost. Interest on floating rate intercompany notes are payable quarterly in arrears.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 SEPTEMBER 2020

18 Auditors' remuneration The auditors remuneration for the Trust for the period is \$30,450 (2019: \$30,450).

19 Events Subsequent to reporting date Since 30 September 2020 and as at the date of this report, the trust has undertaken transactions in the ordinary course of business. The most significant of these transactions include:

- Reduction in the Demand Note of \$550 million on 28 October 2020
 Increase in the Demand Note of AUD \$1.88 billion on 16 November 2020

• Reduction in the Demand Note of \$650 million on 26 November 2020

No other matter, item, transaction or event of a material and unusual nature has arisen in the interval between the end of the financial year and the date of this report that, in the opinion of the Trust Manager, has significantly affected or may significantly affect the operations of the Trust, the results of those operations, or the state of affairs of the Trust in future financial years.

20 Commitments, contingent assets and contingent liabilities There are no commitments, contingent assets or contingent liabilities outstanding as at 30 September 2020 (2019: nil), other than those already disclosed in this report.

TRUST MANAGER'S DECLARATION

In the opinion of NAB, the Trust Manager of the NAB Covered Bond Trust:

The financial statements and notes set out on pages 6 to 21:

 (a) give a true and fair view of the financial position of the Trust as at 30 September 2020 and its performance for the year ended on that date; and

(b) comply with the provisions of the Establishment Deed and Australian Accounting Standards (including the Australian Accounting Interpretations) and International Financial Reporting Standards.

2. There are reasonable grounds to believe that the Trust will be able to pay its debts as and when they become due and payable.

3. The Trust has been conducted in accordance with the Establishment Deed dated 10 November 2011 and the Management Agreement dated 11 November 2011.

Signed for and on behalf of National Australia Bank Limited as Trust Manager of NAB Covered Bond Trust:

Independent Auditor's Report to the unitholders of NAB Covered Bond Trust

Opinion

We have audited the financial report of NAB Covered Bond Trust (the Trust), which comprises the statement of financial position as at 30 September 2020, the statement of comprehensive income, statement of changes in net assets attributable to unitholders and statement of cash flows for the year then ended, notes to the financial statements, including a summary of significant accounting policies, and explanatory notes and the Trust Manager's report.

In our opinion, the accompanying financial report presents fairly, in all material respects, the financial position of the Trust as at 30 September 2020 and its financial performance and its cash flows for the year then ended in accordance with Australian Accounting Standards.

Basis for Opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Report* section of our report. We are independent of the Trust in accordance with the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants* (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Information Other than the Financial Report and Auditor's Report Thereon

The Trust Manager is responsible for the other information. The other information is the Trust Managers' report accompanying the financial report.

Our opinion on the financial report does not cover the other information and accordingly we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Trust Manager for the Financial Report

The Trust Manager is responsible for the preparation and fair presentation of the financial report in accordance with Australian Accounting Standards and for such internal control as the Trust Managers determine is necessary to enable the preparation and fair presentation of the financial report that is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the Trust Manager is responsible for assessing the Trust's ability to continue as a going concern, disclosing, as applicable, matters relating to going concern and using the going concern basis of accounting unless the Trust Manager either intend to liquidate the Trust or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

As part of an audit in accordance with the Australian Auditing Standards, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Trust's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Trust Manager.
- Conclude on the appropriateness of the Trust Manager's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Trust's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial report or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Trust to cease to continue as a going concern.

 Evaluate the overall presentation, structure and content of the financial report, including the disclosures, and whether the financial report represents the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Trust Manager regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
